**Oil Spill Prevention and Response:**

Attachment 2 was not included in the copy sent to BCDC. State Lands should be sure to check with the Office of Spill Prevention and Response to ensure the Shore Terminals, LLC, spill contingency and response plan is still valid. If it is not, or due for an update soon, BCDC should be notified as we are required to review and comment on the adequacy of spill prevention and response plans.

**Fish and Wildlife and Marshes and Mudflats:**

The Bay Plan includes policies aimed at protecting the biological resources of San Francisco Bay. The document notes that surveys would have to be done to identify specific habitats and/or species that are of concern. In the renewal of the lease, State Lands should consider whether there is a way to have the project site surveyed for environmentally sensitive habitats and rare and endangered species. Environmentally sensitive habitats should be protected from disturbances that may have an adverse impact on those habitats or the species within them.

Again, thank you for the opportunity to comment on the Environmental Impact Assessment for the Shore Terminals, LLC, Marine Terminal lease renewal. If you have any questions regarding these comments or other matters, please feel free to contact me at (415) 352-3641 or [nicks@bcd.ca.gov](mailto:nicks@bcd.ca.gov).

Sincerely,

NICHOLAS SALCEDO  
Coastal Analyst
